

### BOARDING

Boarding is offered for canine and feline patients. Runs and kennels are available in several sizes for dogs. Cat cages for felines are in a separate area, away from canines. Our experienced kennel staff make sure your pet is comfortable, walked, fed, and cared for while you are away. Sunday evening pickup is available.

### GROOMING

Our experienced groomer loves working with clients to determine what cuts and styles look best for your pet. Having your pet groomed with us is not only affordable, it is convenient. Drop off in the morning and pick up later, we're here until 6:00pm. An appointment is required.

## ABOUT US

At Gentle Care Animal Hospital, we are passionate about pets and their owners. As an exclusively small animal practice, we provide comprehensive care such as vaccines, wellness exams, surgery, diagnostic workups for sick patients and senior pet care. We enjoy developing strong, long term relationships with our clients to best serve their pet's needs.

## TECHNOLOGY

As technology changes we strive to provide our patients with the most current diagnostic and surgical equipment. We have....

- Digital X-rays
- In-house laboratory
- Laser Surgery
- Video Ear Scope
- Tonometry
- Glucose monitoring

BOARDING • GROOMING • WELLNESS

## WELLNESS CARE

Yearly examinations are recommended for pets. Examinations help to identify and treat problems before they progress. Updating vaccinations and performing routine testing annually keeps your pets happy and healthy year round.

## PROTECT YOUR PET MONTHLY!

Flea and tick control, heartworm preventive, and intestinal parasite protection should be given monthly, year round. We see fleas, ticks and other parasites even during the winter months. If a pet never goes outdoors, fleas and ticks can come in on our shoes and clothing. Therefore they can be introduced into an indoor environment, thus causing problems for those pets too. A variety of products are available to protect your pet and your family (roundworms and hookworms can be transmitted to people). We have several oral and topical products in the clinic or more available through our online pharmacy.

Ask us which product is best for your pet.

## SURGERY

Surgeries are done Monday through Friday. Pre-anesthetic bloodwork and examinations help mitigate anesthetic risks. Pre-operative pain management and monitoring help smooth your pet's recovery. Our doctors and staff are dedicated to making sure your pet is comfortable when they are at their most vulnerable.

DENTISTRY • VACCINES • SURGERY

## DENTISTRY

70% of dogs and cats over the age of 3 have some form of dental disease. Poor dental health can lead to bad breath, tooth loss, and damage to the body's organs. In addition to thoroughly cleaning the teeth, an oral exam is performed with assessment of disease below the gum line. Dental X-rays are used to assess periodontal and dental health.

## SENIOR CARE

As pets age, their needs change. We can help you and your pet face some of those challenges ranging from loss of vision or hearing, arthritis, diabetes, separation anxiety, and senility. A good quality of life can often be increased by diagnosis and choosing the best treatment plan for your pet. We want to provide that choice for you and your aging pet.

Visit our website at [www.nixavet.com](http://www.nixavet.com) Our clients can create a pet portal through our website to access vaccine records, message the clinic or order in-clinic medication refills. For added client convenience, we have an online pharmacy link on our website where clients can purchase products to be shipped to their home.
